

Application Guide

Compounding and Polishing Application: Aqua-Buff® Products

Use these Aqua-Buff® products to remove scratches from and polish composite patterns, plugs, masters and molds. Also use them to remove scratches from and to clean FRP parts, metals and painted surfaces.

[Aqua-Buff 1000-W Fast Cut Compound](#)

[Aqua-Buff 2000 Compound and Polish](#)

[Aqua-Buff 1000-F and 100-W Fast-Cut Compound](#)

Spread Aqua-Buff 1000-F or 1000-W Fast Cut Compound on the surface to be compounded with a brush or cloth, several square feet at a time--using one-half the normal amount--and mist the surface with water. Immediately machine buff with a clean, damp compounding pad. Repeat the process to eliminate scratches from exceptionally hard surfaces. Should the compound become dry while being buffed, re-wet again by misting the surface with water. Follow with Aqua-Buff 2000 Compound and Polish for the ultimate shine.

[Aqua-Buff 2000 Compound and Polish](#)

Spread Aqua-Buff 2000 Compound and Polish on the surface to be compounded with a brush or cloth, several square feet at a time--using one-half the normal amount--and mist the surface with water. Immediately machine buff with a clean, damp lamb's wool-type pad. Repeat the process to eliminate scratches from exceptionally hard surfaces. (Or if you haven't done so, first use Aqua-Buff 1000-F or 1000-W Fast-Cut Compound). Should the compound become dry while being buffed, re-wet again by misting the surface with water.

Note: *For best results, use machine buffers that generate at least 2500 rpm for Aqua-Buff products.*
