

## **DUNAPOL® C 224 L**

Rev. N°6 - Date 04/30/2019

| Description |
|-------------|
|-------------|

Two-component polyurethane system suitable to obtain a rigid foam

Blowing agents: Carbon Dioxide

Ozone Depletion Potential: 0

### **Typical characteristics - Polyol**

| Component             |            |              | Polyol            |
|-----------------------|------------|--------------|-------------------|
| Name                  |            |              | DUNAPOL® C 224 L  |
| Density (25°C/77°F)   | ASTM D891  | lb/ft³ (g/l) | 67.4 (1080)       |
| Viscosity (25°C/77°F) | ASTM D2196 | P (mPa s)    | 9.6 (960)         |
| Storage temperature   |            | °F (°C)      | 50-95 (10-35)     |
| Shelf Life            |            | Months       | 6                 |
| Appearance            |            |              | Dark green liquid |

## **Typical characteristics - Isocyanate**

| Component             |            |              | Isocyanate            |
|-----------------------|------------|--------------|-----------------------|
| Name                  |            |              | DUNAPOL® A 310        |
| Density (25°C/77°F)   | ASTM D891  | lb/ft³ (g/l) | 74.9-77.4 (1200-1240) |
| Viscosity (25°C/77°F) | ASTM D2196 | P (mPa s)    | 1.8-2.6 (180-260)     |
| Storage temperature   |            | °F (°C)      | 50-95 (10-35)         |
| Shelf Life            |            | Months       | 6                     |
| Appearance            |            |              | Brown liquid          |

#### **Mixing Ratio**

| in and in a second             |       |         |  |
|--------------------------------|-------|---------|--|
| Mixing ratio by weight POL/ISO | parts | 100/100 |  |

### Typical characteristics of reaction

| Components temperature |                    | °F (°C)        | 70 (21)    |
|------------------------|--------------------|----------------|------------|
| Cream time             |                    | h min' sec"    | 1'10"±5"   |
| Gel time               |                    | h min' sec"    | 5'50"±20"  |
| Free rise density      | EN 1602/ASTM D1622 | lb/ft³ (kg/m³) | 10.3 (165) |

### Characteristics of the polymer (int. procedure DU/25)

| . , ,                                       |                      |                         |              |
|---|----------------------|-------------------------|--------------|
| Applied density                             | EN 1602/ASTM D1622   | lb/ft³ (kg/m³)          | 16.2 (260)   |
| Minimal core density                        | EN 1602/ASTM D1622   | lb/ft³ (kg/m³)          | >14.0 (>224) |
| Compressive resistance –                    |                      |                         |              |
| Parallel (23°C/73°F)                        | EN 826/ASTM D1621    | psi (kPa)               | 595 (4100)   |
| Compressive resistance –                    |                      |                         |              |
| Parallel (-165°C/-265°F)                    | EN 826/ASTM D1621    | psi (kPa)               | 1827 (12600) |
| Tensile strength - Parallel (-165°C/-265°F) | EN 1607/ASTM D1623-A | psi (kPa)               | 493 (3400)   |
| Tensile strength - Parallel (23°C/73°F)     | EN 1607/ASTM D1623-A | psi (kPa)               | 450 (3100)   |
| Closed-cell content                         | ASTM D6226           | %                       | >95          |
| Thermal conductivity - Initial (10°C/50°F)  | ASTM C518            | BTU·in/hr·ft²·°F (W/mK) | 0.27 (0,039) |
| Thermal conductivity - 190 days (10°C/50°   | E)                   |                         |              |

Thermal conductivity - 180 days (10°C/50°F) (25 mm thickness sample aged 180 days at

23°C/73°F, 50% R.H.) EN 12667/ASTMC518/ASTM C177 BTU·in/hr·ft²·°F (W/mK) 0.32 (0,045)

#### **Handling notice**

In order to obtain the best results, thermostatic conditioning of components is essential.

Wherever possible apply products in ventilated areas, wearing gloves, protective eyewear, barrier creams and suitable protective clothes. Avoid contact with unhardened materials.

In case of accidental contact with the skin, wash with lukewarm water and soap for at least 10 minutes. Do not wash affected areas with solvents as this may increase contamination.

In some applications polyurethane may present fire risks, e.g. if exposed to fire or to excessive heat in presence of oxygen or air, including when welding or cutting with torches.

Lifetime of products is referred to materials stored in sealed containers in dry rooms, at recommended temperatures and protected from direct sunlight.

The expiry date is printed on the packaging.

Data coming from tests performed in laboratory, with components at the indicated temperature; manual mixing with a mechanical mixer at 1500-2500 rpm, in free rise in box/glass or in closed mold at the suggested temperature.

It is the Customer's responsibility to determine if product described herein is appropriate for Customer's purposes and end-use and to ensure that working place, storage and disposal practices are in compliance with any applicable law.

#### Remarks

For usage information, personal protective equipment, transport, storage and disposal of waste it is essential to refer to the Material Safety Data Sheets.

Values shown are determined from laboratory tests and obtained under controlled conditions; they outline typical characteristics and they do not constitute anyhow a sales specification; they are based on DUNA-USA's current knowledge and experience of the products when properly stored, handled and applied in accordance with our recommendations.

This Technical Data Sheet cancels and replaces any other previous issue.

DUNA-USA Inc. does not any accept responsibility for incorrect use of its products as it cannot ensure the correct methods of application have been followed; we therefore specifically disclaim any liability for consequential or incidental damages of any kind, including lost profits.

DUNA-USA Inc. reserves the right to change the data in this information sheet without any prior notice.
